

## BEST OF TMAN

- If everyone had a gun, there would either be a lot less crime or a lot more dead people.
- No system can get 100% efficiency?  
Obviously you forgot about anti-matter.
- Ugh...if that isn't enough for anyone to swear off the backdoor, then please kill yourself.
- Seriously, while it's possible that I'm somehow not smarter than you, I wouldn't bet on it.
- As snoop dog once said "a joint in every mouth and a foot in every bitch's ass that doesn't pay me".
- If you're from Wisconsin you deserve to get shot by a Hmong from St. Paul.
- Fish are horrible to eat.  
If I was starving, I'd catch a fish just so I could shit on it, then throw back in.
- Maybe he snorted all his crack
- Bitch, I make toasters like yo moms sucks dicks.  
FO A LIVIN'.  
OHHHHHHHHHHH!
- And my thesis is 10 inches long.  
Oh wait...thesis...whoops.
- I'm just saying that the market stimulates thought. Whether it's thoughtful thoughts or thoughtless thoughts, who knows?
- Haha, being dumb can be a good thing.
- I don't think engineering is a company.  
But it is an important job in many companies.
- Ok, here's what you do:  
tie a rope around your neck, stand a chair and tie the other end to something taller than you, and then you jump off!
- \*shrugs\* I'd o it just to be different and baffle experts.
- So it must not exist if we can't travel to it.
- I just mean that a lot of these perception based reality philosophies rely on basing events from the past to determine your future.
- Does the future exist? Is it a place that could be traveled to with some special vehicle?
- If someone fucks you, fuck them back. But don't fuck them twice.
- Corporations allow for standardization across the nation as far as pricing and service is concerned and their prices are the lowest, which makes them automatically the best.

- No big cities = poor state.
- Perhaps the future co-exists with the present too, but we simply don't have the technology to get there at the moment.
- Free will can only exist if there is no one to stop you.
- If a business isn't incorporated, it isn't big.
- Why would you bother kissing when you can go straight into the sex?
- English words come from England! They get their words from Germany who gets its words from Greece.
- It depends which of those bays is Tampa bay.
- People are the same everywhere, and everything is all the same.
- Why should anyone deserve to not be murdered without putting in for some sort of balancing action
- First of all, females don't have orgasms. They don't even receive physical pleasure from sex. It's all mental for them. They just get really excited that some guy is about to make them pregnant and they get to have lots of his babies.
- A female orgasm has no biological function.
- Tough to think about even going to college when the kid is going to need to get a job from 15 on so she can eat something more than mac/cheese.
- Not to sound like a racist or something, but Africans typically have the most fast twitch muscle in the legs of any race in the world.
- Many poisons are natural. So are allergies.
- There is no pleasure lost from circumcision. I think you're thinking of castration.
- Why would I want to squeeze my own lemonade? It stings your eyes and is a bitch to clean up.
- Acceleration is the only real test of a car. Who gives a shit about turning or slowing down?
- Two ducks walk into a bar...  
I don't remember how the rest goes, but your mother's a whore.
- What so unnatural for a cave man to pick up a fallen tree branch and smash someone?  
Obviously baseball followed.
- I'll give in to swimming since it doesn't require any special equipment. But it's not natural either...you have to learn how to do it.
- If someone is throwing something away then it has no value.
- I thought Dems were DFL and Reps were GOP.
- Molecules are made of atoms.  
Atoms are made of many things and interact with many things on a fundamental level.  
We don't fully understand and/or haven't even discovered all of this things and interactions yet.

- ...why would the two parties bother with private court? Too expensive when they can just work out a deal with an arbitrator...
- There is a difference between getting ass and dealing with it.
- This is how i can tell you're old or a history studier.  
I have college level education and the only thing i know about Churchill is he was from England.
- Music has concerts to make money.
- A canadian island wouldn't be dependent upon air travel for freight either. You can obviously get ships up there...just not very many at a time. You'd probably have to form a line.
- It depends how you think out your thoughts.
- So you're saying exposure to the sun causes skin cancer?  
Yeah...i'm sure that's what sun tan lotion companies would like you to believe.
- What the hell do you have against vaginas?!
- Just sign up for a credit card and live off that until you can get a job.
- What if you aren't attracted to men but have sex with a man?
- Do you honestly think that showing your dick to your friends (who happen to be male) in the shower makes you gay?
- They don't waste their time with human special forces. Little robots infiltrate the house and kill you in your sleep.
- I read somewhere (possibly here) that if you got to the edge of the universe it would be just like starting again at the other side, or something.
- If we're talking about sex, the act of intercourse between a willing man and woman, only the woman can decide to let a man in her.  
That's the whole point of how sex is, a man is giving while the woman is receiving. She is the only one that can decide if she wants to receive something.  
It would be the same thing as saying that FedEx gets to decide if they'll delieve a package to you. They're always going to be delivering, it's up to you if you want to receive it.
- I aspire to be more than a dreamer of a dream. Of course, it doesn't necessarily have to be the US or all of the US.
- I'm a serious guy.
- Who will win? Not Bush.
- That Alfred Nobel guy was pretty smart.
- Did you know you can make fire from ice?
- All i'm saying is if we can get all the business in the US to leave the US, we can weaken them to the point where we have more money than they do. Once we have more money we win.
- To be honest, how much longer do you think we'll have cars even?  
I have this image where, instead of a car, everyone has some type

of helicopter or hover-craft that can do verticle take-offs and landings. Then you wouldn't need roads. You could just take off and go directly to where you need to go. This would make roads obsolete. Perhaps we'd still need walking paths?

- Also, i don't know how you can say the Canadian economy is doing better when the Candian Dollar is worth almost half that of the American dollar.
- No one helped us fight off the British oppression and yet we are the strongest country in the world.
- I love beautiful, swedish lesbians.  
Dolph Lundren was good in Rocky 4 too!
- I mean we should be eating transfatty acids so that our kids and their kids will get used to them. Then they'll be able to eat as much fast food as they want and not die.
- This is why I hate all this reverse-evolution diet bullshit. All this fucking bullshit that says we should go back to the days of cavement or only eat raw food like they did hundreds of years ago.
- Clocks are machines that measure a figment of our imagination. However, the mechanisms of the clocks are subject to realitivity. Which proves nothing about time.
- Wow....why are there so little black people in Boston?  
Is it all hispanics or what?
- Sorry, but two people who are not trained in hand-to-hand combat can't beat each other up.
- I'll just assume that IP means internet piracy
- if you don't say that 1 day is from midnight-midnight then the day technically never ends.
- I'm not retarded you guys..  
(then less than a day later, and in the same thread)  
Man i'm retarded.
- Women have orgasms?
- You simply assumed you would die in the future.
- There really isn't anything worth doing in Seattle that you can't do in Des Moines. And Portland is arguably worse than Des Moines when it comes to stuff to do.
- BOTH the Giants and Jets play in the same place. One has to go.
- Ice hockey isn't a real sport so I don't give a shit.
- The game hockey is a good one. I enjoy playing floor hockey much.
- The game of hockey in general is obviously a sport. However, only in it's ground-based forms is it a real sport.
- real sport is one in which you have to run to move around.
- [Canada is] Big but unpopulated.  
You either live in: Vancouver, Edmonton, Calgary, Winnipeg, Toronto, or Montreal.

- Starvation is obviously what will happen since the earth can support that many people.  
Violence/accidents will always be around...forever.  
However, I just think that Cancer is nature's way of keeping us from getting too populated.  
That and homosexuals.
- Sorry to say it, but I think that world would easily be worse than our current one.  
No government, yes. Instead, you have the church in absolute power controlling every aspect of your moral lives. And then on top of that, you must donate money every sunday to the church. Worse than taxes.  
I'll take the government over that anyday.
- To be a nihilist you have to destroy shit, don't you?
- Why would you want to do pushups? They won't **atrophy** your muscles
- Calculators are for physics, not math.
- Apparently people in Spain use to gargle piss to get their teeth white.
- Anyway, sex = vaginal intercourse.  
Oral and anal = sodomy.  
Looking and touching are just that.
